

TGS07

Robust tailgate spreader with unique design features

The Gritex TGS07 combines the robustness of an auger-driven V-Box spreader with the simplicity and easy mounting of a tailgate spreader, it's our largest tailgate spreader.

The open-auger design gives contractors the option to spread a variety of materials, typically limited to V-Box spreaders.

PRODUCT SPECIFICATIONS

The SaltDogg® TGS07 is our largest Tailgate spreader with some unique design features for easy mounting, set up and operation. This includes a very robust double walled polypropylene hopper, stainless steel auger trough and a heavy duty vibrator.

The open-auger design and steep walled angle on the hopper gives operators the ability to spread a wide variety of substrates. The TGS07 also features an adjustable stainless steel chute for use with wet or dry products.

Fitted with a heavy duty polypropylene lid which can be opened from either back or front for easy loading. The TGS07 is supplied with in cab controller for easy operation along with all wiring and a mounting bracket.

This makes it ideal for municipalities, shopping centres, industrial estates, car parks, hospitals and private contractors.

MAIN FEATURES

- **Capacity 315 Litres.**
- 230mm Polymer Spinner.
- Dual Shaft Gear Motor (patent pending).
- Horizontal Auger Feed Mechanism.
- Variable Speed Controller with Vibrator Switch (Part Number 3011864)
- 1 metre to 10 metre Variable Spread Width.
- Polyethylene/Steel Construction.
- Powerful 200 pound vibrate motor to combat 'bridging' (Part Number 3007416)
- Unit Weight 86 kgs.
