PRODUCT SPECIFICATIONS

Manufactured by SaltDogg® in the US, this 12 volt electrically powered, rugged, reliable multi-use gritter is our mid-size tailgate gritter for a range of different applications and environments. Easily mounted on a wide range of donor vehicles including quad bikes, cars, ATVs, small tractors or on our trailer mount it can be towed behind a forklift.

The TGS02 is supplied with a variable speed controller to adjust the spreading width and a vibrate kit which plugs directly into this controller. The powerful vibrate motor can be engaged when the grit sticks or 'bridges' over to ensure even grit distribution.

The gritter incorporates a double skin polypropylene and stainless steel design for strength and durability.

The TGS02 is ideal for municipalities, shopping centres, industrial estates, car parks, hospitals and private contractors.

MAIN FEATURES

- **Capacity 85 Litres.**
- Rugged black polymer hopper with lid, constructed with stainless steel components to resist rust and corrosion.
- Heavy-duty 12-volt dual shaft gear motor.
- Material flow and spread width ranges from 3 to 20 feet and are controlled from an in-cab electronic spreader control panel (Part 3011864).
- The ultra-smooth hopper interior in addition to the auger design, provides for easy material flow and reduced material "bridging".
- The TGS02 is supplied with a heavy duty vibrate motor which can be engaged from the control panel should the the grit be damp and 'bridge'.
- Stainless Steel adjustable flow gate for extra level of adjustment if using fast flowing substrate.
- Unit Weight 30 kgs.
