PRODUCT SPECIFICATIONS

Manufactured by SaltDogg® in the US, this 12 volt electrically powered, rugged, reliable multi-use gritter is our mid-size tailgate gritter for a range of different applications and environments. Easily mounted on a wide range of donor vehicles including quad bikes, cars, ATVs, small tractors or on our trailer mount it can be towed behind a forklift.

The TGS03 is supplied with a variable speed controller to adjust the spreading width and a vibrate kit which plugs directly into this controller. The powerful vibrate motor can be engaged when the grit sticks or 'bridges' over to ensure even grit distribution.

The gritter incorporates a double skin polypropylene and stainless steel design for strength and durability.

The TGS03 has proved very popular with municipalities, shopping centres, industrial estates, car parks, hospitals and private contractors.

MAIN FEATURES

- **Capacity 230 Litres.**
- Rugged black polymer hopper with lid, constructed with stainless steel components to resist rust and corrosion.
- Heavy-duty 12-volt 4HP spreader motor.
- Material flow and spread width ranges from 3 to 30 feet and are controlled from an in-cab electronic spreader control panel (Part 3011864).
- The ultra-smooth hopper interior in addition to the auger design, provides for easy material flow and reduced material "bridging".
- The TGS03 is supplied with a heavy duty vibrate motor which can be engaged from the control panel should the the grit be damp and 'bridge'.
- Stainless Steel adjustable flow gate for extra level of adjustment if using fast flowing substrate.
- Unit Weight 80 kgs.
